

Concealed Magnetic Locks with Key

Read these instructions carefully and keep for future reference.

PARTS LIST

- A** 4x Magnetic Locks
- B** 4x Catches
- C** 24x Screws
- D** 1x Magnetic Key
- E** 1x Key Holder
- F** 4x Template

INSTALLATION

For installation you will need a pencil and screwdriver

1. Choose where you want to position the magnetic lock. Align catch with the edge of the cabinet, orientate the catch with the arrows pointing outwards, fix into position with screws included. Note: Leave a small gap for guide.

2. Insert guide under catch with adhesive strip facing out and ensure lines on guide are aligned with the edge of catch. Peel adhesive on guide and close drawer or cabinet.

3. Open drawer or cabinet. Peel adhesive on Magnetic Lock and place in center of guide. Apply pressure.

4. Remove paper guide. For added strength fix in position with screws provided. Tighten catch screws.

OPERATION

To open, place the magnetic key on the outside of the door or drawer at the spot where the product is positioned, the cupboard door or drawer will be unlocked and ready to open. Close the cupboard or drawer again to engage the lock.

To deactivate the lock (during periods of non-use of the lock) without dismantling the product: move the lock slide button so that the lock is deactivated. The product is then in an unlocked position.

CAUTION: Magnetic Key should be kept out of reach of children at all times, use the Magnetic Key Holder to mount the key in a safe location.
